- HTML&CSS
- Javascript
- React js
- Node js
- Express js
- Mongodb
- React Native

LANGUAGE

- English
- Hindi

PROFILE

Enthusiastic and detail-oriented MERN Stack Developer with hands-on experience in building dynamic web applications using MongoDB, Express.js, React.js, and Node.js. Adept at translating client requirements into functional and visually appealing solutions. Strong foundation in front-end and back-end technologies, with a commitment to continuous learning and professional growth. Proven ability to work effectively in fast-paced environments, delivering high-quality code and solutions on time.

COURSE WORK

Object-oriented programming , Data structures & Algorithm, Database management System , Operating system , cyber security

PROJECTS

1. Ecommerce website

Developed a full-stack e-commerce application using the MERN stack (MongoDB, Express.js, React.js, Node.js) Implemented features such as user authentication, product listing, shopping cart functionality, and payment integration.
Project link: https://mons-ecommerce.onrender.com

2.. Chat Application (MERN Stack with Socket.io)

Developed a real-time chat application with instant messaging, user authentication, and end-to-end encryption
Project link: https://chat-application-je46.onrender.com

4. React.js Project with Animation UI

Developed a project with advanced animation and UI elements using React.js and libraries like Framer Motion
Project link : https://aniketsinghproject.netlify.app

5. Dog API Website (React.js)

Built a website using the public Dog API to display random dog images. This project showcases my skills in API integration and handling asynchronous data fetching in React. Project link: https://react-api-mons.netlify.app

6. Responsive Design Project (Next.js)

Created a responsive design project specifically for Android devices.
Project link: https://nextjs-bano.vercel.app
